

Healthcare Revenue Cycle Support Built Around Your Organization

Medical billing, credentialing, payer enrollment, contracting, coding, A/R, denial management and selected operational support for U.S. healthcare organizations.

COMPANY OVERVIEW

Nexora RevTech LLC is a U.S.-based healthcare revenue cycle management company. We help healthcare organizations organize complex administrative workflows, improve operational visibility and coordinate selected functions across the revenue cycle. Engagement scope, responsibilities, systems, reporting and performance measures are agreed during discovery and implementation.

CORE CAPABILITIES

Medical Billing & Claims Charge entry, claim preparation, submission workflows, rejection handling and payment posting support.	Credentialing & Enrollment CAQH, Medicare, Medicaid and commercial payer enrollment, revalidation and maintenance workflows.
Coding Support Documentation-aware coding workflows, quality review and selected audit support.	A/R & Denial Management Aging segmentation, payer follow-up, appeal workflow support, escalation and root-cause visibility.
Contracting Support Payer outreach, contract tracking, selected evaluation support and workflow documentation.	Reporting & Analytics Agreed operational reporting, status visibility, work queues and stakeholder communication.
Front & Back Office Support Eligibility, benefits, authorizations and selected administrative functions based on scope.	Consulting & Workflow Review Operational assessment, responsibility mapping, workflow design and improvement priorities.

ORGANIZATIONS & SPECIALTIES

Nexora can discuss support for individual providers, physician groups, clinics, hospitals, ambulatory surgery centers, laboratories, imaging centers, behavioral health organizations, rehabilitation providers, home health agencies, hospices, urgent care organizations and other healthcare entities. Specialty-specific scope is evaluated around documentation, payer, coding, authorization and follow-up requirements.

ENGAGEMENT APPROACH

1. Discovery	Define organization, systems, payer mix, challenges and priorities.
2. Scope	Document selected functions, responsibilities, controls and reporting.
3. Implementation	Configure workflows, access, training, quality checks and escalation.
4. Operations	Perform agreed activities with visible ownership and communication.
5. Optimization	Review patterns, priorities and approved workflow improvements.

WHY NEXORA

Coordinated Scope	Selected services aligned around the broader revenue cycle rather than isolated tasks.
Accountable Workflows	Documented responsibilities, quality controls, work queues and escalation paths.
Practical Visibility	Agreed status reporting and communication designed for operational decision-making.
Flexible Engagement	Support can be scoped around one function or a broader coordinated workflow.

TRANSPARENCY & COMPLIANCE NOTE

Specific capabilities, access controls, security requirements, performance measures and compliance responsibilities must be confirmed in the applicable agreement. This capability statement does not guarantee financial results, payer approval, enrollment timeframes or a particular operational outcome. Do not send patient information or protected health information through the public website.
